

Why do people oppose the Keystone XL pipeline?

BECAUSE THERE IS A DIFFERENCE BETWEEN WHAT

WE NEED

and

TransCanada WANTS

to reduce our dependence
on foreign oil

to increase our use
of foreign oil

to use Oklahoma sources
of energy — wind, solar,
bio-fuels and natural gas

us to Canadian Tar Sands Crude
from 2000 miles away

to protect private property rights of
U.S. Citizens

to take private property from U.S. citizens
to be used by a Canadian company

To protect the
sovereignty of the
United States.

to use the power of the United States
government against citizens on behalf of
a foreign company.

to protect the security of United
States.

to use Tar Sand Crude in
which Chinese owned
companies are
investing heavily

Cleaner sources of energy like solar
wind, bio-fuels and natural gas

us to use the dirtiest, most
environmentally destructive oil there is.
