Growing Method: Grass-fed / chemical-free

Availability:

Home-grown, grass-fed beef — sold by the quarter. No drugs, hormones, or antibiotics.

We sell our grass-fed beef year round, by reservation. All of our cows have been raised on our farm. All of the animals are gentle and enjoy the natural grasses. We do not feed store-bought feed (they are grass fed) and we do not use chemicals, growth hormones, drugs or antibiotics on the animals. The beef is lean, yet very tasty.
