Products are available on a seasonal basis but generally speaking something is available all the time. We are family owned and operated. We use no commercial fertilizers or insecticides consequently you will occasionally find a bug, or a hole made by one, in our produce.

We sell our produce direct from our farm to anyone who would like to come and see us. We are also a co-producer for the Squeezepenny CSA and if you're interested in purchasing a share, deliveries are made to Plano, McKinney and Frisco. As time and energy permits, you may also find us occasionally at one of the local farmers' markets.

**Please make an appointment if you want to pick up produce/eggs/fryers at our farm.**
