Categories: • Meats, Eggs/Poultry, Fish, Specialty Meats & Dairy

Growing Method: Chemical-free — ***Hormone-Free / No Antibiotics***

Availability: Year 'round

- **Range-fed Chickens and Eggs**

Our chickens are exposed to fresh grass daily. Eggs from pastured chickens have 285% the amount of Omega 3 fatty acids as USDA standard eggs and are up to 55% lower in cholesterol.

- **Grass-fed/finished Beef**

Our pastured meat is very lean — which means they have up to 60% fewer calories than grain-fed meats — and are lower in saturated fats.

- **Pastured Pork**

We are one of the few producers of all-natural pork in the North Texas area.

Our chicken and pork have an all-natural diet with a custom-mixed grain ration — with access to all our natural pastures. Additives, roughage, byproducts or preservatives are never allowed in any of our rations.

Our meat is high in Omega 3 and CLA's which are essential fatty acids. Other nutritional benefits of Dominion Farms meats include higher vitamin and protein content. Our meats are very lean which means they have fewer calories and are lower in saturated fats.

Our animals are raised in an environment that promotes an abundance of room, plenty of sunshine, and minimal stress.

Since we consider ourselves to be stewards of the land, all our practices are designed to improve the soil and allow maximum benefit from the land we oversee.

Dominion Farms has passed the extreme test of quality produced Kosher beef as certified by the CRC.
