- Categories:**
- Vegetables – 5 varieties of Tomatoes / Peppers / Kale / Collard Greens / Beets / Spinach / Cabbage / Beans / Lettuce / Okra
  - Poultry & Dairy – Whole Chicken / Eggs

**Growing Method:** We employ ***NOTHING BUT ORGANIC METHODS*** on our farm – absolutely ***NO*** inorganic puts in our egg, poultry, and vegetable production. We sprout all our own plants from heirloom, non-GMO seeds and ***never*** use ***ANY*** chemical fertilizers, pesticides, or growth hormones. We are in full production beginning early in June. We continue until early fall with all types of greens, cabbage, brussel sprouts, and carrots. We produce our own organic compost and organic compost teas as fertilizer. We mix and spray our own pest control using natural soap, hot cayenne pepper, garlic, onion, and water. Our methods of weed control are hand removal and spraying with organic apple cider vinegar.

**Availability:** Early June through fall (depending on rainfall)
